

NICHOLAS HO

Full Stack Developer

Jakarta, Indonesia | +62 81904009193 | nikko150905@gmail.com | linkedin.com/in/nichoho | github.com/NichoHo

SUMMARY

Computer Science undergraduate and full-stack developer with 2+ years building production web applications and AI systems, spanning React/Next.js frontends, C#/.NET and Laravel backends, and machine learning pipelines. Experienced leading small engineering teams through Agile sprints while personally architecting and shipping the underlying code.

WORK EXPERIENCE

Lead Developer | Nexus Software Development Agency

Oct 2025 – Present

- Build and ship full-stack websites for diverse clients using Next.js and Tailwind CSS, translating business requirements directly into modern, scalable frontend code.
- Own full-stack development lifecycles across concurrent client projects, directing **User Acceptance Testing (UAT)** to ensure on-time delivery against strict performance benchmarks.

Galva Group

Part-Time Full Stack Developer

Apr 2024 – Present

- Apply **Object-Oriented Programming (OOP)** principles in **C#** to architect scalable backend logic for an enterprise **Warehouse Management System (WMS)**.
- Built a real-time **Transport Tracker** using **React** and a **C# REST API** to give warehouse teams live visibility into product logistics.

Full Stack Developer (Freelance)

May 2023 – Aug 2023

- Built responsive internal sales dashboards using **ASP.NET**, **Bootstrap**, **JavaScript**, and **jQuery** to digitize manual sales operations, including complex backend logic for sales data processing.

PROJECTS

F1 Undercut Predictor

- Built a **Flask** analytics engine with a serialized **Python** ML pipeline to calculate optimal pit-stop strategies and undercut advantages from telemetry metrics.
- Designed a responsive, clean web interface using modern layout conventions to visualize live **time-series** tracking parameters.

Technical Lead & Developer | Flux Budget App

- Coordinated a team of **4 engineers** through daily standups while personally architecting the **Laravel** backend, including automated background workers for recurring bills and budget-limit enforcement.

Technical Lead & Developer | FaQ Assistant (RAG Pipeline)

- Coordinated a team of **3 developers** via standups while personally architecting a document-ingestion framework using **LangChain** for PDF parsing, with local semantic search via **FAISS** vector search for hallucination-free retrieval.

RESEARCH

Machine Learning Algorithms for HIV/AIDS Prediction using Explainable AI

ICORIS Conference, 2025

- Co-authored a study analyzing socio-behavioral data to detect HIV/AIDS, achieving **97% accuracy** with **Random Forest** and **XGBoost**, using **SHAP** to enhance model transparency for clinical decision-making.

Hybrid MediaPipe-GRU Architecture for Efficient BISINDO Recognition

Undergrad Thesis, 2025–Ongoing

- Developing a lightweight spatial-temporal deep learning network (**MediaPipe-GRU**) optimized for low-resource environments, integrating non-manual markers.

EDUCATION

Computer Science (Global Class) | Binus University

2023 – Present

- GPA: **3.83 / 4.00**

Student Exchange Program | Sejong University, Seoul, South Korea

Feb 2026 – Jun 2026

- GPA: **4.40 / 4.50** (Academic Percentile: **98%**)

SKILLS

Software Engineering & Languages: JavaScript, C, PHP, C#, SQL, Node.js, Laravel, ASP.NET, REST API Design, Git

Frontend Development: React.js, Next.js, Tailwind CSS, Bootstrap, jQuery

AI / Machine Learning: Python, Flask, PyTorch, TensorFlow, OpenCV, MediaPipe, Scikit-Learn, LangChain, FAISS Vector Databases, RAG Pipelines, Time-Series Analysis, Data Pipeline Design

Agile Collaboration: Agile/Scrum Ceremonies, Daily Standups, Sprint Coordination, Cross-Functional Team Leadership, Requirements Gathering

Languages: English (IELTS 7.5), Indonesian (Native)
