

NICHOLAS HO

ABOUT ME

Computer Science undergraduate at Binus University with over 2 years of professional experience. Currently holding dual roles as a Lead Developer at Nexus Software and a Part-Time Full Stack Developer at Galva Group. Proven track record in engineering complex Warehouse Management Systems using ASP.NET & SQL, alongside building modern client web solutions with Next.js & Tailwind CSS. A proactive problem-solver committed to delivering scalable, high-quality software architectures.

PERSONAL INFORMATION

-  Computer Science (Global Class)
-  081904009193
-  nikko150905@gmail.com
-  /nichoho
-  /NichoHo

TECHNICAL SKILLS

- Languages:** JavaScript, C, Python, PHP, C#, SQL.
- Frontend Development:** React.js, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap, jQuery.
- Backend & Frameworks:** Node.js, Laravel, ASP.NET.
- Cloud & DevOps:** Alibaba Cloud (Certified), AWS, Git.
- Soft Skills:** Technical Leadership, Mentorship, Project Management, Cross-functional Collaboration.

WORK EXPERIENCE

Full Stack Developer (Part-time)

Galva Group

(Apr 2024 – Present)

- Architected a comprehensive Warehouse Management System (WMS) using ASP.NET.
- Developed a Transport Tracker system using React and C# Web API to monitor product logistics in real-time.

Lead Developer

Nexus Software Development Agency

(Oct 2025 – Present)

- Spearheaded the development of high-performance websites for diverse clients using Next.js and Tailwind CSS.
- Managed the full development lifecycle for client web solutions, translating business requirements into modern, scalable frontend code.

Full Stack Developer (Freelance)

Galva Group

(May 2023 – Aug 2023)

- Developed responsive internal sales dashboards using ASP.NET, Bootstrap, JavaScript, and jQuery to digitize manual sales operations.
- Designed and implemented complex backend logic to handle sales data processing.

Software Developer (Internship)

Galva Group

(June 2022 – July 2022)

- Engineered a location-tracking CRUD application integrating Google Maps API and real-time chatting.
- Built the solution using VB.NET (Visual Basic) for field communication and data tracking.

RESEARCH

Machine Learning Algorithms for HIV/AIDS Prediction using Explainable AI

ICORIS (2025)

Co-authored a study analyzing socio-behavioral data to detect HIV/AIDS, achieving 97% accuracy with Random Forest and XGBoost while using SHAP to enhance model transparency for clinical decision-making.

CERTIFICATIONS

- Alibaba Cloud Certified Associate: Cloud Engineer** (May 2025)
- NVIDIA: Building Conversational AI Applications** (Aug 2025)
- AWS Educate: Getting Started with Compute & Introduction to Cloud 101** (Oct 2024)

EDUCATION

- Sejong University** (Feb 2026 – June 2026)
 - Student Exchange Program – Seoul, South Korea
 - Enrolled via Binus Global Class.
- Binus University** (2023-Present)
 - GPA:** 3.83
 - Freshmen Leader & Partner:** Mentored new students during orientation.
 - Staff of Web Development (HIMTI):** Contributed to TECHFEST & TECHNO event websites.

NICHOLAS HO

ABOUT ME

Computer Science undergraduate student at Binus University with over 2 years of professional software development experience and a specialized focus on Artificial Intelligence and Computer Vision. Proven track record in designing hybrid machine learning architectures, developing intelligent RAG pipelines, and training computer vision models. Highly adaptable technical leader, currently completing a student exchange program at Sejong University in Seoul, South Korea.

PERSONAL INFORMATION

Computer Science (Global Class)

081904009193

nikko150905@gmail.com

/nichoho

/NichoHo

TECHNICAL SKILLS

- **AI / Machine Learning:** Python, PyTorch/TensorFlow, MediaPipe, OpenCV, Scikit-Learn, XGBoost, Random Forest, SHAP (Explainable AI), RAG.
- **Software Engineering & Languages:** JavaScript, C, PHP, C#, SQL, Node.js, Laravel, ASP.NET.
- **Cloud & DevOps:** Git, Docker, AWS, Alibaba Cloud.
- **Soft Skills:** Technical Leadership, Cross-functional Collaboration, Project Management, Mentorship.

PROJECTS

F1 Undercut Predictor

- Developed an analytics engine utilizing serialized Python learning pipelines to calculate optimal pit-stop strategies and undercut advantages based on telemetry metrics.
- Constructed a responsive, clean user interface using modern layout conventions to visualize live time-series tracking parameters.

FaQ Assistant (RAG Pipeline Platform)

- Architected a custom document ingestion framework utilizing LangChain for automated PDF parsing and recursive character text splitting.
- Implemented local semantic search using HuggingFace embeddings and a FAISS vector database, enabling deterministic, hallucination-free extraction of exact source context.

WORK EXPERIENCE

Part Time Full Stack Developer | Galva Group (Apr 2024 – Present)

- Architected a comprehensive Warehouse Management System (WMS) using ASP.NET.
- Developed a Transport Tracker system using React and C# Web API to monitor product logistics in real-time.

Lead Developer | Nexus Software Development Agency (Oct 2025 – Present)

- Spearheaded the development of high-performance websites for diverse clients using Next.js and Tailwind CSS.
- Managed the full development lifecycle for client web solutions, translating business requirements into modern, scalable frontend code.

Freelance Full Stack Developer | Galva Group (May 2023 – Aug 2023)

- Developed responsive internal sales dashboards using ASP.NET, Bootstrap, JavaScript, and jQuery to digitize manual sales operations.
- Designed and implemented complex backend logic to handle sales data processing.

RESEARCH

Machine Learning Algorithms for HIV/AIDS Prediction using Explainable AI ICORIS Conference (2025)

Co-authored a study analyzing socio-behavioral data to detect HIV/AIDS, achieving 97% accuracy with Random Forest and XGBoost while using SHAP to enhance model transparency for clinical decision-making.

EDUCATION

- **Sejong University** (Feb 2026 – June 2026)
 - Student Exchange Program – Seoul, South Korea
- **Binus University** (2023-Present)
 - **GPA:** 3.83
 - **Freshmen Leader & Partner:** Mentored new students during orientation.

NICHOLAS HO

ABOUT ME

Computer Science undergraduate student at Binus University with over 2 years of professional full stack development experience. Specializes in bridging the gap between complex software architectures, data science, and automated workflows. Proven track record of translating business requirements into scalable technical solutions, designing intelligent data pipelines, and implementing machine learning models. Highly adaptable technical leader, currently completing a student exchange program at Sejong University in Seoul, South Korea.

NICHOLAS HO

ABOUT ME

Forward-thinking Software Engineer with over 2 years of professional software engineering experience spanning enterprise environments and development agencies. Proven track record designing, building, and optimizing modern backend architectures, developer-facing platforms, and intelligent AI-powered solutions. Adept at reducing engineering friction by optimizing database performance, streamlining API pipelines, and implementing secure, scalable development practices. Combines strong software engineering principles with specialized expertise in Generative AI pipelines and cloud environments to champion engineering excellence.

PERSONAL INFORMATION

-  Computer Science (Global Class)
-  081904009193
-  nikko150905@gmail.com
-  /nichoho
-  /NichoHo

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Node.js, C#, SQL, Python, PHP.
- Backend & Architecture: ASP.NET Core, Laravel, REST APIs, Microservices, Distributed Systems Architecture.
- Databases & Performance: SQL Server, MySQL, PostgreSQL, Query Optimization, Database Profiling.
- AI & Developer Tooling: LangChain, FAISS Vector Databases, RAG Pipelines, Generative AI Systems, HuggingFace.
- Frontend & Tooling: React.js, Next.js, Tailwind CSS, Bootstrap, jQuery.
- DevOps: Docker, CI/CD foundations.

WORK EXPERIENCE

Part Time Full Stack Developer | Galva Group (Apr 2024 – Present)

- Architected a comprehensive Warehouse Management System (WMS) using ASP.NET.
- Developed a Transport Tracker system using React and C# Web API to monitor product logistics in real-time.

Lead Developer | Nexus Software Development Agency (Oct 2025 – Present)

- Spearheaded the development of high-performance websites for diverse clients using Next.js and Tailwind CSS.
- Managed the full development lifecycle for client web solutions, translating business requirements into modern, scalable frontend code.

Freelance Full Stack Developer | Galva Group (May 2023 – Aug 2023)

- Developed responsive internal sales dashboards using ASP.NET, Bootstrap, JavaScript, and jQuery to digitize manual sales operations.
- Designed and implemented complex backend logic to handle sales data processing.

PROJECTS

Flux Budget App

- Built a complex personal finance platform that utilizes automated background workers to handle scheduled recurring bills and budget limit enforcement metrics.
- Implemented dynamic multi-currency conversions and robust financial tracking infrastructure built for scalability and performance.

FaQ Assistant (RAG Pipeline Platform)

- Architected a custom document ingestion framework utilizing LangChain for automated PDF parsing and recursive character text splitting.
- Implemented local semantic search using HuggingFace embeddings and a FAISS vector database, enabling deterministic, hallucination-free extraction of exact source context.

 - **Freshmen Leader & Partner:** Mentored new students during orientation.

NICHOLAS HO

ABOUT ME

Performance-driven Software Engineer with over 2 years of professional experience architecting backend systems, optimizing relational databases, and designing scalable data pipelines. Demonstrated expertise in solving complex business problems by translating high-level requirements into clean, horizontally scalable software architectures. Strong foundational understanding of distributed systems, algorithmic optimization, and modern API infrastructure. Highly adaptable technical leader with deep analytical aptitude, currently completing an international exchange program at Sejong University in Seoul.

PERSONAL INFORMATION

-  Computer Science (Global Class)
-  081904009193
-  nikko150905@gmail.com
-  /nichoho
-  /NichoHo

TECHNICAL SKILLS

- Core Backend & Systems: Java (Foundational), C#, ASP.NET Core, PHP, Laravel, Node.js, RESTful Web APIs.
- Data Architecture & Databases: SQL Server, MySQL, PostgreSQL, Relational Database Design, Query Profiling & Optimization.
- Distributed Systems & Infrastructure: Horizontal Scaling Concepts, Caching Mechanisms, HTTP Servers, JSON Web Tokens (JWT), Distributed Data Ingestion Frameworks.
- AI & Search Technologies: FAISS Vector Databases, Semantic Search, LangChain, Python-serialized Data Pipelines.
- Engineering Paradigms: Object-Oriented Programming (OOP), Software Design Principles, Code Reviews, Technical Leadership.

WORK EXPERIENCE

Part Time Full Stack Developer | Galva Group (Apr 2024 – Present)

- Architected a comprehensive Warehouse Management System (WMS) using ASP.NET.
- Developed a Transport Tracker system using React and C# Web API to monitor product logistics in real-time.

NICHOLAS HO

ABOUT ME

Versatile Computer Science undergraduate student with over 2 years of professional hands-on backend and full-stack software development experience. Highly proficient in constructing scalable web applications, designing relational data structures, and developing robust APIs using C# (.NET) and PHP (Laravel). Proven ability to write clean, maintainable code, troubleshoot technical bottlenecks, and collaborate within cross-functional teams to deliver impactful digital products. Eager to apply strong analytical skills to assist senior engineers and contribute to real-world development lifecycles.

PERSONAL INFORMATION

-  Computer Science (Global Class)
-  081904009193
-  nikko150905@gmail.com
-  /nichoho
-  /NichoHo

TECHNICAL SKILLS

- Backend Languages & Frameworks:** C#, ASP.NET Core, PHP, Laravel, Node.js, RESTful Web APIs.
- Database Systems:** SQL Server, MySQL, PostgreSQL, Relational Database Design.
- Frontend Technologies:** React.js, Next.js, Tailwind CSS, JavaScript, Bootstrap, jQuery, HTML5/CSS3.
- Version Control & Tooling:** Git, GitHub, Docker, Command Line Interfaces.
- Core Soft Skills:** Analytical Problem Solving, Written and Verbal Communication, Technical Documentation, Proactive Learning, Professional Teamwork.

WORK EXPERIENCE

Part Time Full Stack Developer | Galva Group (Apr 2024 – Present)

- Architected a comprehensive Warehouse Management System (WMS) using ASP.NET.
- Developed a Transport Tracker system using React and C# Web API to monitor product logistics in real-time.

Lead Developer | Nexus Software Development Agency (Oct 2025 – Present)

- Spearheaded the development of high-performance websites for diverse clients using Next.js and Tailwind CSS.
- Managed the full development lifecycle for client web solutions, translating business requirements into modern, scalable frontend code.

Freelance Full Stack Developer | Galva Group (May 2023 – Aug 2023)

- Developed responsive internal sales dashboards using ASP.NET, Bootstrap, JavaScript, and jQuery to digitize manual sales operations.
- Designed and implemented complex backend logic to handle sales data processing.

PROJECTS

Flux Budget App

- Built a complex personal finance platform that utilizes automated background workers to handle scheduled recurring bills and budget limit enforcement metrics using Laravel.
- Contains multi-currency conversions and financial tracking infrastructure built for scalability and performance.

FaQ Assistant (RAG Pipeline Platform)

- Architected a custom document ingestion framework utilizing LangChain for automated PDF parsing and recursive character text splitting.
- Implemented local semantic search using HuggingFace embeddings and a FAISS vector database, enabling deterministic, hallucination-free extraction of exact source context.

RESEARCH

Machine Learning Algorithms for HIV/AIDS Prediction using Explainable AI

ICORIS Conference (2025)

Co-authored a study analyzing socio-behavioral data to detect HIV/AIDS, achieving 97% accuracy with Random Forest and XGBoost while using SHAP to enhance model transparency for clinical decision-making.

Hybrid MediaPipe-GRU Architecture for Efficient BISINDO Recognition Integrating Non-Manual Markers in LowResource Environments Thesis (2025-ongoing)

Developing a lightweight spatial-temporal deep learning network (MediaPipe-GRU) optimized to run efficiently on low-resource environments.

EDUCATION

- Sejong University (Feb 2026 – June 2026)**
 - Student Exchange Program – Seoul, South Korea
- Binus University (2023-Present)**
 - GPA: 3.83
 - Freshmen Leader & Partner: Mentored new students during orientation.

NICHOLAS HO

ABOUT ME

Detail-oriented and versatile Computer Science undergraduate student (GPA: 3.83) with over 2 years of professional full-stack development experience across enterprise environments and software agencies. Possesses a solid foundation in Object-Oriented Programming (C#) and web development technologies (HTML5, CSS3, JavaScript, jQuery). Proven ability to execute precise frontend modernizations, adhere closely to structured UI design standards, and collaborate effectively with cross-functional teams to deliver uniform, high-quality digital products.

PERSONAL INFORMATION

-  Computer Science (Global Class)
-  081904009193
-  nikko150905@gmail.com
-  /nichoho
-  /NichoHo

TECHNICAL SKILLS

- Frontend Development:** HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap, Tailwind CSS, React.js, Next.js.
- Software Engineering & OOP:** C#, ASP.NET Core, PHP, Laravel, Node.js.
- Database Systems:** SQL Server, MySQL, PostgreSQL, Relational Database Design.
- Version Control & Workflows:** Git, GitHub, Docker, SDLC Foundations, Command Line Interfaces.
- Core Competencies:** Adaptability, Strict Attention to Detail, Proactive Learning, Adherence to Design Standards, Technical Documentation, Professional Teamwork.

WORK EXPERIENCE

Part Time Full Stack Developer | Galva Group (Apr 2024 – Present)

- Applied rigorous OOP principles in C# to structure scalable application logic for a comprehensive WMS.
- Developed a Transport Tracker system using React and C# Web API to monitor product logistics in real-time.

Lead Developer | Nexus Software Development Agency (Oct 2025 – Present)

- Spearheaded the development of high-performance websites for diverse clients using Next.js and Tailwind CSS.
- Managed the full development lifecycle for client web solutions, translating business requirements into modern, scalable frontend code.

Freelance Full Stack Developer | Galva Group (May 2023 – Aug 2023)

NICHOLAS HO

ABOUT ME

Versatile and forward-thinking Computer Science undergraduate student (GPA: 3.83) with over 2 years of professional full-stack development and backend engineering experience. Specializes in bridging the gap between complex software architectures, cloud readiness, and automated workflows. Proven track record as an adaptable technical leader, adept at translating complex business requirements into scalable cloud-compatible applications, designing data pipelines, and implementing intelligent machine learning systems. Eager to leverage strong technical advisory and consulting skills to support diverse enterprise projects.

NICHOLAS HO

ABOUT ME

Driven Computer Science student and Full Stack Engineer with a proven track record of bridging the gap between technical execution and business strategy. Experienced in leading cross-functional teams of engineers, defining product requirements, and managing agile lifecycles for complex web applications and AI tools. Exceptional communicator adept at conducting user research, running sprint ceremonies, and prioritizing backlogs to deliver highly scalable, user-centric products.

PERSONAL INFORMATION

Computer Science (Global Class)

081904009193

nikko150905@gmail.com

/nichoho

/NichoHo

SKILLS

- **Product Management:** Technical Roadmapping, Product Requirement Documents (PRDs), Sprint Planning (Scrum/Agile), Backlog Grooming, Feature Prioritization, User Research.
- **Leadership & Strategy:** Cross-functional Team Management, Stakeholder Communication, Agile Ceremonies, Resource Allocation.
- **Data & Analytics:** Time-Series Analysis, Data Pipeline Design, Data-Driven Performance Optimization, KPIs & Metrics.
- **Technical Domain:** React, Next.js, Tailwind CSS, Laravel, PHP, Python, C#, SQL, System Architecture.

LEADERSHIP EXPERIENCE

- **Flux Budget App** (Project Manager & Lead Developer)
 - Led a cross-functional team of 4 engineers to build a complex personal finance platform that handles scheduled recurring bills and budget limit enforcement metrics using Laravel.
 - Authored PRDs and translated feature concepts into actionable engineering backlogs.
 - Lead stand-ups, sprint planning, and retrospectives to ensure team alignment and hit strict timeline milestones.

- **FaQ Assistant** (Project Manager & Lead Developer)
 - Managed a team of 3 developers to design a custom document ingestion framework for automated PDF parsing and recursive character text splitting.
 - Conducted user feedback loops to isolate support pain points, scoping an MVP solution that optimized manual workflows.
 - Ran weekly alignment meetings and code reviews, balancing feature requests against deadlines to eliminate scope creep.

WORK EXPERIENCE

Part Time Full Stack Developer | Galva Group (Apr 2024 – Present)

- Applied rigorous OOP principles in C# to structure scalable application logic for a comprehensive WMS.
- Developed a Transport Tracker system using React and C# Web API to monitor product logistics in real-time.

Lead Developer | Nexus Software Development Agency (Oct 2025 – Present)

- Collaborated directly with business clients to extract software requirements, transforming complex requests into intuitive technical scopes and functional wireframes.
- Managed full-stack lifecycles for bespoke web applications, ensuring projects met rigorous performance metrics and clean aesthetic design benchmarks.

RESEARCH

Machine Learning Algorithms for HIV/AIDS Prediction using Explainable AI

ICORIS Conference (2025)

Co-authored a study analyzing socio-behavioral data to detect HIV/AIDS, achieving 97% accuracy with Random Forest and XGBoost while using SHAP to enhance model transparency for clinical decision-making.
